

*Telehealth Saskatchewan uses videoconferencing technologies to share broadcasts throughout the province in real time.*

# Live Your Best Life with MS

Wednesday, March 28, 2018

7:00-8:30pm

Join us for a free Telehealth presentation with Dr. Iliia Poliakov, MS neurologist. He will speak about his work at the MS Clinic, plus the treatment of MS and its main symptoms.

After medical school, Dr. Poliakov completed a five-year neurology residency at the University of Saskatchewan, immediately followed by a fellowship in MS and neuroimmunology at the University of Calgary. In November 2016, he became the first dedicated multiple sclerosis neurologist to work in Saskatchewan and the director of the Saskatoon MS Clinic, at City Hospital. In addition to clinical duties, he has interests in medical teaching, as well as research in clinical informatics and health quality outcomes.

The session will be broadcast from Saskatoon City Hospital, but viewing sites will be available throughout the province in hospitals of most cities.

**Whether you plan to participate at the Saskatoon site, or in a community closer to your home, please register with [rachelle.phenix@mssociety.ca](mailto:rachelle.phenix@mssociety.ca) or call (306) 244-2114, extension 5050, before March 26th.** *We'll need your name, email, phone number, plus your community and number attending.*

This session is made possible by an educational grant from:
